DETAILED ACTION

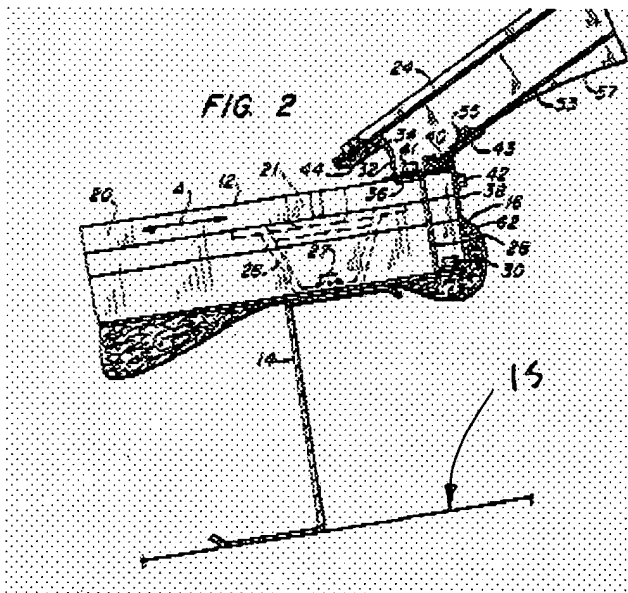

Allowable Subject Matter

The indicated allowability of claim 13 is withdrawn in view of the newly discovered reference(s) to VOEGELE, Jr. and DAMRON. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent #6,079,167 to VOEGELE Jr. in view of US Patent #5,561,952 to DAMRON. VOEGELE, Jr. discloses a roof structure (10) including a plurality of rafters (14) spaced from a roof deck (12) thereby to provide an insulation (62) therebetween, column 5, line 61, and away from the interior ceiling (15), see below, and a skylight (24) mounted

Art Unit: 3635

between two rafters (14), see figure 1. VOEGELE, Jr. discloses the basic claimed roof structure except for including a roof vent. DAMRON teaches that it is known in the art to provide the skylight (10) of roof structure with vents (17). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the roof of VOEGELE, Jr. with the roof skylight/vent of DAMRON in order to enhance the air flow throughout the roof and the entire structure while also condensing the number of elements disposed on the roof. the combination skylight/venting device make available a unitary structure and decreases the amount of work required to give air to the structure.
